VoIP Solutions Company

PORTA ONE

PBXpress

PBXpress: Fully Supported IP PBX for ITSP Business Customers

PBXpress is a Unix-based IP PBX with call recording and other multiple features, a product for demanding business customers of modern ITSPs.

PortaOne provides ITSPs with technical support of PBXpress on 24/7 basis.

- Additional source of revenue from midsized business customers

- 100% service reliability backed by automatic switch to PSTN in case of IP network failure

- Seamless access to 911 emergency services over PSTN

- Optimized network load with clients' internal traffic going through their own networks

- Easy to install and operate without advanced VoIP skills

- Advanced features to capitalize on modern technology: call recording, archiving and backup, voicemail, and auto attendant

- Dramatic reduction in overall capital and operational costs for clients

- Data and telephony capabilities consolidated into a single network

- Minimal investment risk with maximum scalability
