Questions? Please click above

Our back-end online billing control panel can be setup in other languages as well.

We support the following languages at the moment:-

Arabic, Simplified and Traditional Chinese, Czech, English, Estonian, French, German, Hungarian, Italian, Latvian, Lithuanian, Norwegian, Polish, Portuguese, Russian, Spanish and Swedish.

You can automate your client payments using merchant services so that clients can pay and recharge their accounts in real time.

You can setup the invoices to auto charge their credit cards when bill comes due as well.

We can setup automatic online sign-up form to work with your merchant processor.

We can also support other languages on our Interactive Voice Attendant.

Please select your Private Brand VoIP Plan (to the right) based on your technical skills and the services you wish to sell by clicking on the links "Learn More".

Please click for Globalink Cloud APPs (Software As A Service)

Register your email and submit a ticket to PRE-SALES DEPT.
We will guide through the setup.

Global Mobile OFFICE APP

Take your office with you so that you, your staff or customers can work from any location.
Setup your mobile office with your own voice mail, auto attendant, call queues and dids.
Large enterprise hosted pbx software in the cloud at your finger tips without the large expense.
You can provide your staff or customers online web control panel access to your server so they can manage their call history, voice mail, find-me, follow-me, call queues etc online.
Voice mail can be sent to your email so you can listen to it directly from your smartphone or tablet.
You can make calls from your Android, iPhone, iPad Mobile Client on your smartphone or tablet.
We can provide you US or international dids to link to your account.
Run your business from anywhere in the world. ▸▸ Learn More

Global Click2Call APP

You can initiate the callback via a web page or link in email. Once our server receives the request, it will respond by calling you back to your phone or mobile phone and to the destination or office number where you want your customers to call you.

Visit the HELP CENTER   ### Global Distributor APP

You can provide your agents or distributors online web control panel access to your server so they can manage the pins or accounts they are selling on your behalf. We can setup the commissions to be calculated based on the sales.

How can we help you?

Web SignUp Wizard APP

The **EZ Web Subscription API** is available as an add-on to all our packages. This online signup script will automatically create users and email them the password under your private label reseller name.
Users can then log into our **Web Control Panel** and recharge their funds, check call details record and manage their services online.
You can link this to your existing website for E-Commerce sales.
You must have an approved bank merchant account for the API to work.
You must have a reseller package already setup with us.
