

GLOBALINK VIRTUAL OFFICE ANSWERS, SCREENS USING CALL PROCESSING TECHNOLOGY AND ROUTES CALLS TO VIRTUALLY ANY LOCATION, PROVIDES COMPANY STAFF WITH UNIFIED VIRTUAL EXTENSION NUMBERS, AND PROCESSES LARGE VOLUMES OF CALLS SIMULTANEOUSLY.

You can check your email/voice mail/fax all in one place.

Incoming faxes are automatically converted into a pdf and sent as an email.

Business Class Centrex - enhanced business - class phone auto - attendant typical of very large office phone systems.

Interactive Voice Recognition (IVR) technology without any need for hardware at your site.

Standard features include call forwarding, caller ID, call waiting, call transfer, and other business class features.

Globalink Virtual Office is ideal if you want to setup your own personal local or international phone number with specific numbers set to ring specific destinations. For an example, you can setup our international phone numbers such as a local number in London, United Kingdom to ring your office for an example in Singapore. Your business contacts in London can reach you with no additional cost to call you!! The auto attendant, voice mail and other select unified messaging features can be added to the personal international number as well.

Services include DID or Phone numbers, line extensions, extra minutes for those who use the service to originate calls, and more.

We provide the web control panel that can be customized into your existing website.

Your users or staff will have their own separate login to view call details and manage their account details such as call forwarding etc.

You will also have a master login to setup and manage your users using our web control panel.
